

Linux Group Management – Main Commands

✓ 1. Show All Groups

`cat /etc/group`

✓ 2. Show Groups for a Specific User

`groups username`

+ 3. Add a New Group

`groupadd groupname`

+ 4. Add a User to a Group

- ◊ Append (keep current groups):

`usermod -aG groupname username`

✗ 5. Remove a User from a Group

`gpasswd -d username groupname`

✓ This removes the user from the group.

6. Delete a Group

`groupdel groupname`
